29 June 1970

MEMORANDUM FOR: DDI Information Processing Coordinator
SUBJECT: Standard Magnetic Tape
REFERENCE: Memo from DDI/IPC, Same Subject, dated 22 June 1970

Following are answers to your questions concerning the Proposed Standard Recorded Magnetic Tape for Information Interchange (1600 CPI, Phase Encoded):

- a. We concur with the proposed standard.
- b. The proposed standard does not currently apply to the data or communications systems in NPIC since we have no equipment which records at 1600 CPI.
- c. Adoption of this standard would not immediately affect NPIC. We currently own all of our tape drives, but if we find it necessary to replace this equipment with that which records at 1600 CPI, the implementation impact would be minimal. Benefits would be those derived from product improvement and the facilitation of information exchange through standardization.
- d. We would need three (3) copies of the standard.
